

Sustainable
forestry helps
wildlife thrive.

#ItTakesAForest

Our forests are home to a variety of animals. Through sustainable forest management, we can ensure that wildlife continues to thrive in our forests by maintaining a diversity of habitats, conserving critical and sensitive areas, and keeping special features like old trees and nests on-site.

All Ontarians should be proud of how we manage our forests and the fact that we manage for multiple forests values, including wildlife.

To learn more about how forestry helps wildlife visit **ittakesaforest.ca**.

#ItTakesAForest is a collaborative led by Forests Ontario and local, like-minded individuals and organizations. It delivers fact-based information to the public about forests and forest products, and the role they play in sustaining our growing economy, mitigating climate change and creating healthy environments.
